VACCINATION

ABSTRACT:

Efficiently tracking and managing vaccination data for hospital staff is crucial to ensure comprehensive coverage and compliance with protocols, safeguarding both staff and patient well-being.

PROJECT MANAGER:

- Dr .N. BALAJI

MENTOR:

- Mrs .V. SARANYA

TEAM MEMBERS:

- ARUL JENIFER.A
- BARATH.R
- THAMIZHARASAN.D

PROJECT DESCRIPTION:

Dose Vaccinated Page:

- **Purpose:** This page displays a list of hospital staff members who have received vaccinations along with their vaccination details.
- **Features**:
- **Staff List:** A table or list view showing the names of staff members who have been vaccinated.
- **Vaccination Details:** Information such as the type of vaccine administered, date of vaccination, and dose number (e.g., first dose, second dose).
- **Search and Filter Options:** Allow users to search for specific staff members or filter vaccination data based on criteria like vaccine type or date range.
- **View Only:** Users can view the vaccination data but cannot edit it on this page.

Vaccinated Edit Page:

- **Purpose:** This page allows authorized users to edit and update vaccination data for hospital staff members.
- **Features:**
- **Editable Fields:** Users can edit vaccination details such as the type of vaccine, date of vaccination, and dose number.
- **Staff Selection:** A dropdown or search feature to select the staff member whose vaccination data needs to be edited.
- **Save and Cancel Options:** Buttons to save the edited data or cancel the changes made.
- **Validation Checks:** Ensure that the entered data is valid and follows vaccination protocols (e.g., dose sequence, date validity).
- **Access Control:** Restricted access to authorized personnel (e.g., healthcare administrators, HR personnel) for editing vaccination data.
